Purchase your energy-efficient light bulbs today at:  
[millionLEDchallenge.com](http://millionLEDchallenge.com)

The University of California created the Million LED Challenge to make high-quality, high-efficacy LED light bulbs available at a great price! The light bulbs being offered through the challenge cost on average 46% less than the same light bulbs sold through online competitors.

The goal is to swap out at least one million inefficient light bulbs and replace them with LED light bulbs. Help your campus contribute to the goal and visit the website to see our progress. Each light bulb counts!
