

FUEL REDUCTION UNDERWAY

UCB Wildland Fuel Reduction Project

July – December, 2025

This project reduces wildfire risk and improves evacuation from the removal of dead, dying and hazardous trees and shrubs. Work will occur on approximately 24 acres around structures and roads in the Hill Campus above the main campus of UC Berkeley in areas outlined in red. The numbers within the figure display the sequence of the work.

For more information contact UCB Facilities Services at www.facilities.berkeley.edu or 510 642-1032.
